Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "a lift arm" in line 7 should be --the lift arm--. Note "a lift arm" in line 1.

Regarding claim 2, "fronwardlly" in line 2 should be --frontwardlly--.

Regarding claim 4, "the" in line 2 should be --a--.

Regarding claim 5, this claim is indefinite. "an upper-surface open-ended box-like valve cover body" should be correlated with "a valve cover body" in claim 1. Also "box-like" renders the claim indefinite and should be changed to --box--.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Berg (figure 1).

Note arm 8 and the arm support for 8 (the hump support for shaft 7), the hydraulic circuit (piston 3, the sleeve that confines 3 and the valving into the sleeve) and the hydraulic control (the control mounted above 3 with the piping attached). These elements are all in figure 1.

Regarding the detachably mounting of these structures, note the various bolts in figure 1 holding the above elements together.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2000-092911.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smit in view of Cabrera.

It is unclear how 32 in Smit is actuated to move arm 34. It would have been obvious to use any conventional valve including the valve in Cabrera. Note cover 118, seal 116, hole 114', sub spool 112 and a spool (the section between 112 and 125) in the valve in Cabrera.

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
